Summary

UI/UX Designer based in Bengaluru, working with early-stage startups and product teams to redesign product experiences that quietly lose users – confusing onboarding flows, cluttered dashboards, and checkout pages that cause hesitation. Experienced across SaaS, D2C, and fintech products, with a focus on UX audits, interface redesign in Figma, scalable design systems, and developer-ready prototypes. Approaches every project by understanding the problem first, rather than jumping straight to the solution.

Skills

Top Skills: Figma | Developer Handoff | Interaction Design

Core Areas: SaaS Dashboard Design, Onboarding Flow Optimization, UX Audits, Design Systems, React-Ready Prototypes
